SUBJECT

Confirmation of results - In-class Kaggle competition, Machine Learning 2025-2026

To Whom It May Concern,

I confirm that Nathan Szlagowski took part in the in-class Kaggle competition organised as part of the Machine Learning course at Ghent University during the 2025-2026 academic year, in collaboration with Crunch Analytics.

The assignment required teams to predict resale prices for consumer-to-consumer marketplace listings from product text, and was evaluated by root mean squared error on a held-out private leaderboard. Nathan was a member of Team 13, which ranked first out of the thirteen participating teams.

I am happy to answer any questions regarding this result.

Sincerely,

Prof. dr. Dries Benoit
Professor of Data Science
